

VOLUNTEERS NEEDED FOR SMART SPEAKER TRAINING RESEARCH

The purpose of this study is to evaluate a new smart speaker training program designed for people with motor and/or visual impairments.

Are you eligible? Do you:

- Have a motor impairment or/and blindness or low vision.
- Have a smartphone or computer
- Have the ability to read and converse in English
- Have the ability to read at the 5th grade level or higher
- Have internet access and Wi-Fi network
- Are you 18 years of age or older?

Participants can keep the Alexa device once they finish the study!

IRB#STUDY23070025

What will you do?

Try an online training program about using an Amazon Alexa device and complete an interview on the usefulness and limitations of the material.
This should take up to 2 weeks, 2 or 3 hours in total.

Complete a usability questionnaire.
This should take up to 45 minutes.

Training sessions and the usability questionnaire can be completed at your own pace at your home
